DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-26, drawn to a User Interface, classified in class 706, subclass 12 (Artificial Intelligence, Having Particular User Interface).
 - II. Claims 27-40, drawn to Audio Signal Processing, classified in class 704, subclass 500 (Audio Signal Bandwidth Compression or Expansion).
 - III. Claims 41-43, drawn to Encryption, classified in class 713, subclass 189 (Data Processing Protection Using Cryptography).
 - IV. Claims 44-51, drawn to Audio Function Generators, classified in class 706, subclass 5 (Artificial Intelligence, Having function generator).

2. The inventions are distinct, each from the other because:

Inventions I-IV are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as the ability to alter a signal in such a way that it is not perceptible until the user tries to compress the signal and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify

Art Unit: 2654

such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Because these inventions are distinct for the reasons given above and the search required for each Group I-IV is not required for each other Group, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David D. Knepper whose telephone number is (703) 305-9644. The examiner can normally be reached on Monday-Thursday 0730-1800.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richemond Dorvil can be reached on (703) 305-9645. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
